

Flails

Pedestrian units

The STM range of Super Flail heads have been specifically designed for use with the Scag SWZ culminating in a versatile and robust pedestrian flail mower for all areas particularly grassland and rough with tall thick grass.

Wet or dry, rough or fine, the STM Super Flail range promises a perfect result whatever the conditions. Three models are available in either 30", 36" or 48" cutting widths, each with a choice of fine cut single twisted or rough cut back to back flails (see table opposite). For banks and slopes of up to 45°, a twin wheel kit can be added with high grip AG tyres for extra traction and stability. The option of twin wheel grassland tyres is also available.

With continued focus on health and safety within the industry, an optional anti-vibration kit can be fitted to help reduce hand-arm vibration and problems associated with long periods of mower work.

High performance for increased productivity

Robust and durable construction with 5mm steel plate hood with internal strengthening.

Fully adjustable cutting height via variable castor wheel settings.

Robust rotor provides a full width cutting head.

Reliable belt-drive to gearbox system.

Optional flails for fine cutting or for cutting rough.

Easy fit - STM Super Flails can be fitted to the Scag SWZ deck simply and quickly.

Reliably engineered to require low maintenance and provide hours of uninterrupted use.

Designed and built entirely in the United Kingdom.

Versatile design and features for a quality finish

Model	Cutting Width (in)	Blades	Drive Type	Power Unit	Weight (lbs / kgs)
Super Flail 30	30	Back to back or long / short twisted	Belt	SWZ 16-22 hp	496 / 225
Super Flail 36	36	Back to back or long / short twisted	Belt	SWZ 16-22 hp	519 / 235
Super Flail 48	48	Back to back or long / short twisted	Belt	SWZ 18-22 hp	562 / 255
